

## Call for Papers

### The Greek Lexicon of Ships and Navigation.

#### *Wuthering Seas*

#### Shipwrecks, Storms, and Atmospheric Phenomena in the Greek Maritime Lexicon

Within the framework of *The Greek Lexicon of Ships and Navigation* Project (Scuola Normale Superiore, Pisa, Italy; <https://lessiconavi.sns.it>), the **2nd online workshop**, focused on shipwrecks and atmospheric phenomena threatening navigation, is planned for **January 2027** (further details will be provided in due course).

PhD students and early-career researchers are invited to participate in a discussion of these topics through the historical and linguistic analysis of a group of semantically related Greek terms. Applicants are therefore required to **select at least two from the attached groups of entries (see Annex 1): the Organizing Committee will then assign one of the selected groups taking into account the participant's academic background.**

Papers may be given in **Italian, English, or French**, and must not exceed **20 minutes**. Each paper may address the group of entries as a whole or focus on a single term considered particularly significant. In either case, the paper should provide an in-depth examination of the term(s), addressing etymology, meaning and semantic development, and sources (literary, epigraphic, and papyrological).

Following the workshop, each participant will have the opportunity to **publish on the project's website**, after a **peer review** process, all the entries of the group they have worked on. All published entries are assigned a **DOI** and count as **contributions in collective volume**. In this final written version, entries may be drafted in **Italian, English, French, Spanish, or German**, and must be **structured as follows**: 1) Greek term; 2) translation in the language of the entry; 3) mention of any derived or related terms discussed in the entry; 4) etymology; 5) mention of any linguistically related terms relevant to the *Lexicon*; 6) Greek text and translation of all the lexicographical attestations of the term; 7) mention of any relevant toponyms and cults; 8) detailed commentary; 9) bibliography; 10) any relevant images.

Please **communicate your choice and submit your academic CV to [lgnn@sns.it](mailto:lgnn@sns.it) no later than October 31<sup>st</sup>, 2026**. Anyone who would like further information or is simply interested in the project is welcome to contact us at the same e-mail address.

**Organizing Committee:** prof. Anna Magnetto (SNS), Fabrizio Di Sarro (SNS), Alessandro Perucca (SNS), Maria Beatrice Tosi (SNS)
